

Keep Newfoundland and Labrador frack-free

Hi,

I am writing you today to stress the importance on keeping Newfoundland and Labrador frack-free.

My family is from Newfoundland and every other year we make it home to Cox's cove. Uncles and Aunts are telling us when we visit how concerned they are about keeping the water clean and the devastating effects that fracking will have on the environment. Please keeping Newfoundland free of fracking ,the water and healthy communities are too vital to loose. The jobs often don't materialize promised with fracking and the people are left with the clean up afterwards.

Thank you,

Sincerely,

C. Conarroe
