

Keep Newfoundland and Labrador frack-free

Dea Dr. Gosine and fracking review panelists,

although not a citizen of your great and beautiful province, I would like to add my voice to those who are pleading for a ban on fracking in Newfoundland and Labrador.

Scientific evidence has conclusively shown the adverse effects of fracking in terms negatively impacting on ground and surface water, seismicity, the climate and the socio-economic environment, to mention only Tourism, one of the mainstays of the Newfoundland and Labrador economy.

Respectfully submitted

D. Altenburg
