

Keep Newfoundland and Labrador frack-free

The best thing Newfoundland has going for it, besides a strong and vibrant culture, is a beautiful, rugged clean environment. Left as it is, this will be a living treasure for years to come, and a resource of untold wealth. It will be the envy of all others who have disrespected and destroyed their own environment. Examine what you have. Examine your motives. Examine life, and protect it.

Sincerely,

D. Kuzyk
