

Keep Newfoundland and Labrador frack-free

Please BAN fracking!

Water, wildlife and people are at risk. Earthquakes are also a result of this method. When a company has "trade secrets", then beware.

They will never tell the truth, they tell us what we want to hear. Just look at what's happening in the States, a sign of things to come if fracking is allowed.

We are destroying our planet - we must stop this madness.

Sincerely,

G. Worth
