

Keep Newfoundland and Labrador frack-free

For all the reasons that others will give you and that I will not repeat, I urge you to keep fracking out of Newfoundland and Labrador, the beautiful province that I visited in 1974, 1998, and 2007, both island and mainland, and hope to visit again with its clean air to breath, safe water to drink, healthy food to eat.

Sincerely,

J. Kingshott
