

Keep Newfoundland and Labrador frack-free

You know once upon a time Canadians on a whole , were respected and admired , especially when travelling around the world , now with the last nine years of the Stephen Harper , Conservative Blight , we as Canadians are not thought of in the same light as before . All because of our ecological record which is to say embarrassing , the TAR SANS , NESTLES WATER , massive lay offs in scientific research etc etc ... and North Atlantic oil exploration and the Fracking that is being discussed for Newfoundland and New Brunswick ...enough of this abysmal disrespect for our Canada and of our once respected name.

Sincerely,

M. Scott
