

The literature review, completed by Strategic Concepts Inc, was undertaken to document a list of relevant socioeconomic information available to assist members of the Panel in their analysis.

The literature review consists of a broad based summary report of Internet articles, reports and presentations addressing hydraulic fracturing. The summary has the following information: Title, authors, year study release, timeframe cover by study, jurisdiction considered, the approach or methodology utilized, the impacts considered and a short description of the impacts found, and the report abstract if available.
